

Huck

Huck

Adventurous and sweet, little Huck is now five weeks old. We expect him to be at least 45 pounds when he is fully grown but that is just a guess. Of course, being a puppy, he needs to have lots of attention, training, and plenty of toys to nibble on and carry around with him. Huck would do best in an all adult home or a family with respectful children ages 8 years and older. He needs a home where someone is around most of the time to potty train him and to give him the attention a small puppy needs to grow into a happy, well mannered dog. Huck will go to his forever home when he is 8 weeks old and has had his first vaccine. We are accepting adoption applications now.

- Adoption Fee \$300
- Up to Date on Vaccinations
- Breed: Basset Hound Mix
- Microchipped
- Age: 8 weeks
