

Tawny

It would be impossible to imagine a sweeter, more affectionate dog than Tawny. Nothing makes her more contented than walking or resting beside people who love her. Tall and graceful, she is an enthusiastic eater who takes treats very gently when offered. She is completely house trained if taken outside regularly. Tawny likes long walks and is very good during car rides but she is still fearful at entering a car and needs a boost. She has learned some basic commands since being in her foster home and is ready to be a student for new commands and tricks. She is good with dogs. She loves her foster's large fenced yard where she frolics and rolls in the grass. Tawny would do best in an all adult home or with a family with respectful children age 10 and older.
