

Teddy and Winnie

(bonded pair)

If you are looking for two cute little cuddle bugs, look no further. Teddy, about 14-15 years old, and Winnie, about 9 years old, are both toy poodles and are an extremely bonded pair so they need to be adopted together. Both of these sweet dogs love affection and belly rubs and being close to people—and each other. Teddy unfortunately had a bad experience with another dog and is understandably reactive with other dogs and very protective over Winnie when around other animals. The best home situation would be no other pets, just Teddy and Winnie, with people who can provide them with love and affection in a peaceful environment. They love to go outside and enjoy short walks. They are crate trained and are housebroken (foster mom is available to let them out whenever they need to potty). They have great appetites and love soft treats. Teddy and Winnie are easy to care for and love and they deserve a forever home where they can spend the rest of their lives together. (Like all poodles, they are hypoallergenic and need to be brushed and get a haircut periodically...and they are very cooperative about being groomed.)

- Adoption Fee: \$350 for the pair
- House Trained
- Up to date Vaccinations
- Neutered/Spayed
- Breed: Toy poodles
- Weight: approx. 12 lbs. each
- Age: about 9 and 14 years
- Microchipped
